

COUNCIL OF INFRASTRUCTURE FINANCING AUTHORITIES

## 2026 SRF Workshop

Forging the Future: Strengthening Water Infrastructure Through SRFs

Nov 15 \ Nov 18  
Pittsburgh, Pennsylvania

# CALL FOR PROPOSALS

The Council of Infrastructure Financing Authorities (CIFA) invites members of the Clean Water and Drinking Water State Revolving Funds (SRFs) and the SRF community to submit a proposal to present at the 2026 CIFA Workshop, the nation's premier professional development program for SRF managers and staff. If you don't want to present but know of someone doing great work, or if you have ideas for sessions, please reach out and let us know!

**Proposals are due Friday, July 10th. CIFA will communicate with those who submitted proposals by July 31st.**

## Theme

This year's theme for the CIFA SRF Workshop is Forging the Future: Strengthening Water Infrastructure Through SRFs - giving a nod to our host location, Pittsburgh - "The Steel City."

## Audience

The CIFA SRF Workshop is the largest annual convening of SRF managers and staff in the nation. Last year, nearly 400 people attended the Workshop. The Workshop also draws leadership and staff of the U.S. Environmental Protection Agency and members of the finance, engineering, and technical assistance sectors.

## Guidelines

All submissions must be submitted through the official JotForm, which can be found [here](#).

The program offers up to 20 sessions. Up to four sessions are held concurrently, and are typically 60-90 minutes. Please be as thorough as possible so the Professional Development Committee can make an informed decision about your participation.

CIFA welcomes proposals from across the water sector, including state and federal governments, engineering and finance sectors, and not-for-profit organizations. CIFA will offer a discounted registration rate for presenters. Presenters are responsible for their own travel and accommodations.

Proposals must have one or more clearly defined learning objectives, which define the specific information, skills, and strategies that attendees will acquire from the presentation.

### Examples:

- SRFs will learn strategies to streamline their program procedures.
- SRFs will learn how to improve their cash flow modeling.
